

09:00:47 From Hannah Ward : Hi all
09:00:50 From Shauna Marie : Silicon Valley in the house!!! 💕💕
💕
09:00:56 From Andrea Pepper : I love that background, Julia!
09:01:03 From Linda Dom : Vancouver, Canada in the house joining
all of you!
09:01:08 From Mel Hall : Hi everyone
09:01:19 From Arthur Tobias : são paulo, brasil!
09:01:23 From Paulo Napoli : Hello from São Paulo, Brazil!
09:01:26 From fiona maunder : Hello All :)
09:01:38 From Casey Smith : Los Angeles, Ca here
09:01:39 From Catarina Rêgo : Hello from Portugal!!! Catarina
09:01:42 From Avá Joy : Hello from Melbourne (Naarm) Australia 😊
09:01:58 From Nelson Ramos : Portugal here. Hello everyone!
09:02:04 From Barbara Brickland : good morning from Queensland
Australia 💕💕 Aquarius North node Leo South node
09:02:10 From Catarina Rêgo : Hi Nelson!!! 😊
09:02:23 From ana fialho : Brazilian living in Portugal here, hello
everyone!
09:02:24 From Nelson Ramos : Hi Catarina! Great to see you here
09:02:27 From Annabelle Bennie : Hi All,
09:04:55 From Melinda Klotz : Hello from Missouri!
09:05:38 From Ryta Grabowska : Hello from Belgium :)
09:05:58 From Melissa Lisa : Hi to everyone from Ireland 🍀
09:11:27 From Ryta Grabowska : Balance
09:14:10 From Andrea Pepper : If I remember correctly who the
speaker was, Brian Clark has also been discussing some of this.
09:14:20 From Stacey Simpson : Love these questions and inquiries!
Lots to ponder...
09:15:28 From Casey Smith : Yes, great topic! Perspective is
everything
09:17:20 From Casey Smith : This is why I think astrocartography is
important when evaluating charts
09:18:07 From Linda Dom : riveting, captivating ... loving this
conversation, thank you!!!! 😊
09:19:57 From fiona maunder : Good conversation on this wonder -
ful topic! Thank You
09:20:27 From Wendy Blume : I find working with the axis signs is a
good way to approach the variations in the seasons. The modes are
the same. Most signs seems to adapt to southern seasons quite well,
main exception is scorpio in high spring.
09:27:03 From Virna Koutrakou : The model of the globe with the
great circles that Gemini uses is fantastic! is it custom made, or
Xan we find it online?
09:27:42 From Catarina Rêgo : [https://www.amazon.es/s?
k=armillary+sphere&crid=10T0DUXQW95S&srefix=armillary%2Caps%2C273&
ref=nb_sb_ss_ts-doa-p_1_9](https://www.amazon.es/s?k=armillary+sphere&crid=10T0DUXQW95S&srefix=armillary%2Caps%2C273&ref=nb_sb_ss_ts-doa-p_1_9)
09:27:55 From Catarina Rêgo : you can find it online
09:28:54 From Claire Crocker : Wow this is huge for mundane to
reverse the elevation - so interesting!
09:29:12 From Stefanie Andrzejewski : That's interesting about thw
Planetary War reversal by hemisphere

09:29:15 From Wendy Blume : Perhaps we get caught up in the semantics of north = up = growth = good and south = down = bad. Is there another, more global way to discuss the movement 'north' and 'south' that holds less 'meaning'. Because the event is the same, regardless of how we're viewing it.

09:31:15 From Linda Dom : agreed ... remember we're still sadly subject to 3D "duality" ?!?! we need a new harmonic love language!

09:31:47 From Linda Dom : astrology is still leading the way!!!!

09:32:55 From Willanna Morris : Morning from Mount Isa Queensland Australia 🇺🇸 we are same latitude as Peru 🇵🇪 & I find this fascinating... I wish I didn't have to go to work & hoping I can watch recording & take notes 📝

09:32:58 From Virna Koutrakou : @Catarina Rego, thank you!

09:33:31 From Rochelle Benning : hello all from Bali

09:33:31 From Julija Simas : Yes recording will be sent out xx

09:36:18 From Catarina Rêgo : @Virna Koutrakou 😊

09:39:12 From Casey Smith : So is it all about where you are for it to be exalted, etc. Basically, the idea of looking a astrocartography in a chart.....location, location, location

09:40:43 From L Meikle : We need a larger data set. The power dynamics of ascending and descending heavenly bodies is a good key

09:43:56 From Stefanie Andrzejewski : Uranus & Neptune are noted in the Vedas according to some sources

09:44:21 From Nelson Ramos : This raises an issue to traditional astrology. Urano is visible naked eye

09:44:25 From Chris cunali : Love to you all❤️

09:45:32 From Stefanie Andrzejewski : My nodes are aligned to Sirius & Vega, fantastically

09:45:57 From Casey Smith : The question is has Uranus become visible because we a ready for Uranus as evolution of our species?

09:46:30 From Nelson Ramos : It doesn't really work that way...

09:46:58 From Casey Smith : There are new species, plants, rocks, and colors being discovered too

09:47:43 From Melinda Klotz : Stefanie my nodes are in Cancer/ Capricorn too:)

09:48:14 From Nelson Ramos : Uranus is at the same orbit for millions of years. So if it was seen with naked eyes even in very particular place and special conditions, means that any traditional astrologer in that place should consider Uranus, right?

09:48:20 From Casey Smith : My true North Node Aries 0 degrees

09:48:22 From Rachel Davenport : Is this going to be all about their location?

09:48:26 From Stefanie Andrzejewski : Yeah Girl! @MelindaKlotz You & I are everywhere!

09:49:04 From Jarrod Graham : So every single time the moon crosses the NN it's in line with northern movement experience from the earths perspective?

09:50:13 From Melinda Klotz : Stefanie, we🙄

09:50:17 From Jarrod Graham : How do I get my mind around that as the nodes move through the signs?

09:50:55 From Wendy Blume : I deal with southern hemisphere charts all day long, and see no reason to flip the nodal meanings. I think

we're just too Eurocentric in how we consider them.

09:53:04 From Greg Schubert : This is a bit like the leading Transient in Audio Engineering... the point where the increasing air pressure crosses the horizontal axis of the sine wave...

09:55:23 From Stefanie Andrzejewski : At the bendings

09:56:41 From Melinda Klotz : Would the fixed stars have more prominence of sorts, if there is less time of the moon or planets in the night sky? Not sure if I am wording that right.

09:57:19 From Roberta McKnight : Host a database somewhere

09:57:24 From L Meikle : I have Jupiter conjunct southern node, born in southern hemisphere...

09:59:43 From Roberta McKnight : It seems that, like time, direction is relative ~ yes?

10:00:00 From Jarrod Graham : TY GB.

10:00:20 From Casey Smith : Yes, I think experience is relative

10:01:20 From Ryta Grabowska : Why not the Moon?

10:01:25 From Jarrod Graham : How do I get my mind around that given the nodes are constantly moving retro through the signs?

10:01:49 From Shauna Marie : Loving this conversation! 💕💕💕

10:03:06 From Barbara Brickland : that makes alot of sense

10:03:39 From Melinda Klotz : Chirality comes to mind with all of this too

10:03:54 From Casey Smith : Could you use nodal returns as a way to study people and their experiences with nodes and hemispheres?

10:04:02 From Anita Vanderhaeghe : I like that Julija - and it brings to mind a friend born in London England during a bombing raid in 1943, moved to SAfrica, had her family for 10 years and then moved to Toronto - each place having a completely different life.

10:04:36 From Jarrod Graham : Same reason some see eclipse and some don't

10:04:47 From Roberta McKnight : Might we soon consider the north node, for example, conjunct star Fomulhaut?

10:06:18 From Stefanie Andrzejewski : Reversal based on observational experience due to the hemispherical location on Earth #ParallaxNodes

10:07:01 From ana fialho : That is beautiful

10:07:50 From Arthur Tobias : thats ecocentric perspective. we are earth, living by earth experience

10:08:13 From L Meikle : In the south tho we're still experiencing I moving backwards, so to speak

10:09:00 From Stefanie Andrzejewski : That and, Let Your Freak Flag Fly!

10:09:33 From Jeanne B. : Are there any writings from ancient southern hemisphere astrologers that can give some insite into this topic.

10:09:50 From L Meikle : If we're all in a train idea, the ascendant node could still feel very differently for those in the southern hemisphere.
I know I feel differently if I'm sitting backwards in a train!

10:10:03 From Shauna Marie : I say, 'do what makes your heart sing!' 💕💕💕

10:10:08 From Barbara Brickland : it seems to be a natural way for me to go. thank you

10:10:13 From Faelan Shiva : Did we hear from Brett about how he

works with nodes in astrology?

10:10:14 From Casey Smith : yes, just go where you are called. The chart is only a blueprint or tool for insight IMO

10:10:24 From Melissa Lisa : I believe that Astrology is magic happening on Earth from the skies

10:10:51 From Barbara Brickland : I agree, I'm following my passions

10:11:26 From Anita Vanderhaeghe : love that connecting with the center Gemini Brett! to the core when thinking of someone – move to the core and then back out to where they are as opposed to how the crow flies.

10:11:30 From Laura Ramos : I believe in sandwiching both north and south to be a greater result

10:11:57 From Annabelle Bennie : Australian indigenous peoples

10:13:36 From Kathe Smith : Think of it being here to create a balance of the two signs of the Nodes. Like our two legs work together to get us where we go. Then the squares, if a planet there like the skipped steps taught in evolutionary Astrology, might be the actual directional guidance?

10:13:55 From Stefanie Andrzejewski : But which Ayanamsha, lol

10:14:11 From Wendy Blume : Love that Kathe Smith.

10:15:21 From Andrea Pepper : Kathe, I think balance of the two nodes (both gifts) is very good, too.

10:15:40 From Rochelle Benning : wonderful chat, sorry I have to sign off early 🙏

10:16:46 From Melinda Klotz : Hasn't the dragon been seen as a bear too in the north?

10:17:17 From Andrea Pepper : I do wonder if overdoing the South Node causes problems. It is how I learned it, and I think even though both nodes are gifts, when I overdo my South Node, it does seem like it's given problems, not by sign, but by house.

10:19:38 From Wendy Blume : It definitely seems to be a draining point when overdone.

10:19:48 From Casey Smith : That would be cool (bringing people from other southern hemispheres). Thanks for this great conversation!

10:20:05 From Filipa Matos : thanks for this opportunity

10:20:10 From Andrea Pepper : Right, Wendy.

10:21:27 From Filipa Matos : Agree

10:21:31 From Jarrod Graham : TY so much for your time and making this available Julija, Luis and GB

10:21:41 From L Meikle To All Panelists : Agree

Thank you

10:21:51 From Wendy Blume : Very interesting chat, many thanks.

10:21:59 From Andrea Pepper : Thank you so much. Pretty interesting talk.

10:22:24 From Anita Vanderhaeghe : in this lifetime I identify with my father and my nodes sit on his MC/IC axis – I recognize past life experiences with him .

10:22:29 From Melinda Klotz : My cousin is living back in Brazil now and I have pulled up stellarium a few times for him to show him some of the things going on in the sky in his region and have found it to be helpful.

10:23:09 From Stacey Simpson : I really enjoyed this discussion.

Thank you so much to you all! 💕

10:23:22 From Filipa Matos : 😊

10:23:30 From Paulo Napoli : Great topic and conversation! 🙌🙌🙌

10:23:42 From Filipa Matos : thanks so much

10:23:42 From Anita Vanderhaeghe : thank you all

10:23:46 From Jeanne B. : Thank you all. Great discussion.

10:24:05 From Melinda Klotz : My fathers nodes are on my AC/DC

10:24:16 From Melissa Lisa : really fascinating evening, thanks a million to you all. much appreciated 🌟🌟🌟

10:24:37 From L Meikle To All Panelists : Fair comment about doing event charts. Natal charts are hugely subjective!

Thank you Luis

10:25:03 From erik boen : Many thanks. Eclipses are interesting, PC or not PC, geocentrically or topocentrically and Primary Directions, as mentioned, in mundo versus in zodiaco. Harrison nice example.

10:25:34 From Casey Smith : That was always my problem with math in school. I would ask for my teachers to tell me why and they would tell me to memorize

10:25:54 From Shauna Marie : Yes - this was sooo amazing! Thank you... 💕💕💕

10:26:01 From fiona maunder : Thank You, real good discussion, good questions to hold and let experience unfold!

10:26:29 From Melinda Klotz : I really enjoyed this conversation too! Ha! my solar eclipse born daughter just walked up to me with her new library book "Making A Meal For A Dragon" 😂

10:26:40 From Anita Vanderhaeghe : very fascinating - awesome

10:26:44 From nykole c : thanks!

10:26:44 From Stacey Simpson : Julija rocks! Yay! ✨

10:26:49 From jeny cee : thanks for this fascinating discussion, need more research

10:27:01 From Ryta Grabowska : Thank you so much !!!

10:27:01 From Dru Ish : Thanks so much. Loved it!

10:27:05 From Paulo Napoli : Thanks Julija, Luís and Brett!

10:27:06 From Catarina Rêgo : Thank you for this amazing conversation and for all the cool stuff you've taught!!

10:27:06 From Maggie Kerr : Brilliant conversation thanks!!!

10:27:08 From Nelson Ramos : Thank you. Absolutely great webinar!

10:27:08 From Arthur Tobias : thank you all. that was an incredible conversation!

10:27:09 From Shauna Marie : @melinda Hehehe!!!

10:27:20 From Jill McKeon : thank you, lots to think about and ponder, always wonderful to learn something new

10:27:28 From Greg Schubert To All Panelists : See y'all 😊 Thank you

10:27:31 From Stacey Simpson : I appreciated the slides and props to help!

10:27:36 From Stefanie Andrzejewski : Many thanks to all involved!

10:27:44 From Casey Smith : Links in chat?

10:27:49 From Deb James : Thank you so interesting to contemplate

10:28:05 From Anita Vanderhaeghe : now I have to consider all this as relates to astrocartography too

10:28:09 From Gemini Brett : Hey Deb!
10:28:25 From Dru Ish : Yes let's gather in AUST!
10:28:54 From Barbara Brickland : thank you x
10:29:09 From Margarita Bulgakova : Thank you. One of the most confusing issues, lightened up.
10:29:21 From Roberta McKnight : Thank you 😊
10:29:33 From Catarina Rêgo : 🙌🏻😊
10:29:46 From Melissa Lisa : looking forward to hearing and seeing your morning journey this morning 🌅
10:30:24 From Anita Vanderhaeghe : LOL
10:30:48 From Anita Vanderhaeghe : You are Judi Dench Julija!
10:31:12 From Andrea Pepper : Thank you!
10:31:26 From Shauna Marie : WOW!!!! 💕💕💕
10:32:18 From Renee Aland : Beautiful way to finish
10:32:28 From Casey Smith : Is that Spica below the moon?
10:32:31 From Gemini Brett : Star above Venus is Zavijava... 27.5 Tropical Virgo (in our day and age)
10:32:32 From Deb James : love your work
10:32:46 From Gemini Brett : The star just below the Moon is Zaniah (about 5 tropical Libra)
10:32:50 From Melissa Lisa : absolutely beautiful Gemini Brett, thank you ✨✨
10:32:51 From Shauna Marie : Music is excellent too!!!!
10:32:59 From Casey Smith : Thanks
10:33:03 From Gemini Brett : Closer to the horizon are the shoulders of the Priestess
10:33:20 From Gwen Jessup : Gorgeous 🌟❤️
10:33:31 From fiona mauder : Beautiful
10:33:38 From Gemini Brett : Porrima (a star long associated with the prophetic gift) is the brighter of the two (towards the right)
10:33:41 From Ryta Grabowska : Amazing !!!!
10:34:11 From Casey Smith : Love the reflection in the water
10:34:12 From Laura Ramos : Beautiful!
10:34:14 From Gemini Brett : At the end, you'll see a photo from later in time (just before sunrise) where you can see Spica
10:34:32 From Gemini Brett : That's Spica to the right of my logo
10:34:33 From Shauna Marie : Thank you!!!! 💕💕💕
10:34:34 From Melinda Klotz : Beautifu!!
10:34:41 From Dru Ish : Beauts!
10:34:55 From Melissa Lisa : just WOW 🌌🌌🌌
10:34:58 From Stacey Simpson : Glorious! 🌟
10:35:12 From Casey Smith : Beauty
10:35:13 From Shauna Marie : Heavenly-gorgeous!!!! 💕💕💕
10:35:14 From Catarina Rêgo : Thank you!
10:35:20 From Catarina Rêgo : beautifull!!
